MAIN DUTIES AND ACTIVITIES OF JOB:

- Work collaboratively with entire team to ensure we meet company goals
- Developing, implementing, and managing proper procedures and processes to ensure high inventory accuracy (at part number/location detail and financial basis) for raw material, purchased components, WIP, and finished goods inventory in multi-site facilities
- Implementing necessary strategies to meet and maintain department goals
- Implement and refine effective Solidat Warehouse Management System
- Ensure effective JIT inventory mix sustained at each appropriate location
- Responsible for Material Analyst hiring, training, and overall performance
- Committing to the leadership and development of team members while fostering a positive, collaborative work culture
- Promoting and communicating lean management techniques
- Attend APQP meeting, and provide timely information for program success
- Monitoring daily department outcomes (achieve inventory turns, 100% customer delivery performance, prevent material related downtime and expedited freight)
- Reporting on Key Performance Indicators in relation to department goals
- Ensuring overall safety, quality, and effective performance of Inventory Control and Planning
- Communicating effectively with suppliers (written and verbal) and purchasing team on a daily basis to achieve organizational objectives
- Take leading role in implementing flawless customer product launch and effective engineering changes
- Experience reconciling company inventory at outside processor facilities (remotely and on-site)
- Conduct inventory cycle counts/physical inventory and/or BOM audits on site and at suppliers
- Ensure inventory corrective actions are effective to ensure no repeat issues and read-across method is utilized
- Ensure supplier release issues are resolved effectively
- Maintain action plan to reduce slow moving inventory
- Ensure proper FIFO rotation of inventory
- Provide ongoing timely supplier performance feedback
- Adheres to all company policies and procedures including safety and environmental
- Utilizes effective Housekeeping practices and 5S principles
- Any other reasonable request by management
